"It is not a crime to dream and one has to dream if one has to be on the top of the 'ladders'

-Dr. A.P.J. Abdul Kalam.

The curriculum of a public school is endowed with the rich ingredients necessary to produce fully blossomed young personalities which stand tall, confident, totally self-reliant and hence, an asset to the society. The most important pivot around which the churning of the young generations takes place is the teacher. As teachers we should not try to impress but should leave impressions.

There are diverse personalities in this world that dreamt and executed the dream and became successful and champion of fate in diverse fields of their choice. Let us wake up to a new morning, and go about making the dream come true.

Through the medium of a journal a student gets an opportunity to voice his expression and a sincere effort has been made to keep up this spirit. Always remember to be truthful and honest, be bold and sure of your success.

Good Luck

With best wishes
